

Simply exact.

PRECISE MEASUREMENT TECHNOLOGY FOR GRAVURE CYLINDERS

DiaMet

Determination of circumference and diameter

DuroMet

Measurement of copper and chrome hardness

HelioMet

Determination of engravability

R-Met

Measurement of roughness

Rz-Star

Measurement of roughness

Thickness-Star FE

Measurement of copper layer thickness

MicroMet

Measurement of copper and chrome layer thickness

VideoMet

2D cell analysis

Simple operation as well as reliable, fast and reproducible results: Our extensive portfolio of measurement instruments offers diverse solutions for the requirements of the gravure printing industry.
